

Preferred Parking for 2 Cars:
Cars should be parked side by side close to the garage/front of the house.

Trees hanging over the driveway should be trimmed 12' as heavy, wet snow will push the branches lower.

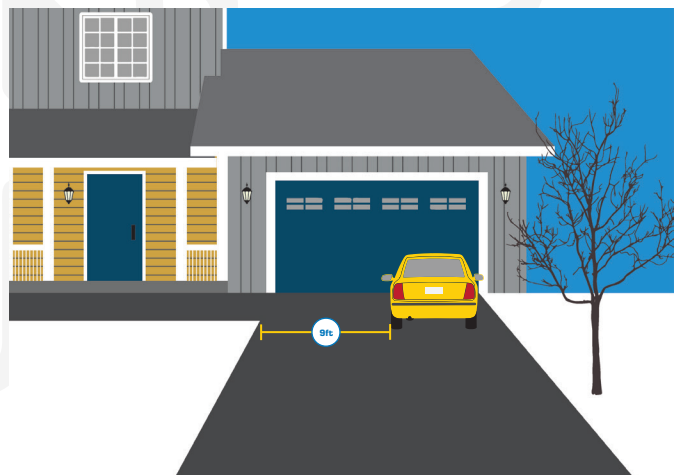

2 Cars Alternate Parking:
Pull up both cars to one side as close to each other as possible.

Basketball hoops should be 10' high if it overhangs onto the driveway.

DO NOT park a car near the end of the driveway. This results in an area that we will not be able to clear.

If a car must be parked in the driveway, park all the way to one side leaving at least 9' of open space next to the car.
